NOTE TO USERS:

This publication provides preliminary agri-food export statistics for 2000 and revised statistics for 1999. The statistical tables contain information for over 50 agricultural and food products (value and quantity) exported from Alberta and Canada. Also, information is provided for 34 export markets classified by product value. Tables presenting exported products by country of destination are sorted by the highest export value in 2000 and limited to the top 25 countries.

Data presented in this publication are subject to revision.

Provided totals may not add up due to rounding.
Per cent changes are calculated on unrounded numbers.

Comments on the contents of this publication are welcome. If you have any suggestions or required further information, please contact:

Alberta's Agri-Food Exports in 2000

Introduction

This report presents information on international agri-food exports for the 2000 calendar year. For the purpose of comparison, it also provides revised statistics on 1999 exports. Alberta international agri-food exports include primary agriculture commodities (animals and crops) and valued added processed products. The latter refers to manufactured products such as meats, other foods, feeds, beverages and by-products of manufacture (crude animal and plant products).

Information on agri-food exports provided in this report is divided into two sections. The first section summarizes agri-food export statistics by product in 1999 and 2000. The second section presents exports by country of destination. The statistical tables contain information for over 50 agricultural and food products (value and quantity) exported from Alberta and Canada. Also, information is provided for 34 export markets classified by product value.

Sources And Methods

International export statistics are compiled by Statistics Canada according to the "General" system of trade defined by the Statistical Office of the United Nations. Under this system, domestic exports encompass all goods grown, extracted or manufactured in Canada, including goods of foreign origin, which have been materially transformed in Canada. Alberta estimates presented herein, represent the portion of total Canadian domestic export statistics and are classified and published according to the Harmonized Commodity Description and Coding System (Harmonized System or HS). The HS is a product classification system used by almost all countries in reporting import and exports statistics. It is consistent for all countries to the 6-digit level.

Exports are, in principle, valued or recorded at the values declared on export documents, which usually reflect the transaction value or the actual selling price. Canadian exports to other countries are valued at "Free on Board" port of exit basis, including freight charges to that point but net of discounts and allowances.

Information on Alberta agri-food exports is compiled by the Statistics and Data Development Unit of Alberta Agriculture, Food and Rural Development (AAFRD). Data are sourced from the International Trade Division of Statistics Canada.

Statistics Canada develops international export statistics from administrative records of Customs. Customs-based export statistics may understate and/or incorrectly portray the destination of exports or the province of origin. Inaccuracies of export data often result from the attribution of exports on a province of lading basis rather than by province of origin. Also, the country of a final destination may be inaccurately reported when exports are routed through an intermediary country before continuing onto their final destination. For example, exports to the United States may be overestimated and exports to other countries such as Mexico or Russia underestimated. As well, caution should be used when reporting exports of some commodities/products, for example: hides and skins, tallow, peas, lentils, dehydrated alfalfa, peat moss, etc. Alberta exports of these products may be underestimated.

In previous years, AAFRD conducted revisions/adjustments to Statistics Canada data to overcome inaccuracies of provincial data at the commodity level. However, as of January, 2001, AAFRD discontinued this adjustment process.

Note**: Statistics on Alberta agri-food exports presented in this report refer to non-adjusted export statistics and are **subject to revision.

INTERNATIONAL AGRI-FOOD EXPORTS

Alberta's agri-food exports, which include primary agriculture commodities and valued added processed products, averaged 13 per cent of Alberta total merchandise exports between 1996 and 2000. It also represents about one-quarter of Canadian total agri-food exports to other countries. As well, Alberta is the second largest provincial exporter of agri-food products in Canada after the province of Ontario.

During the last ten years, from 1991 to 2000, Alberta's agri-food exports more than doubled rising from $2.2 billion to $5.1 billion. This growth was mostly attributable to steady increases in exports to the United States.

Alberta agri-food exports have become diversified, moving more toward value added processed products. Exports of these products more than tripled, from $571 million in 1991 to $2.6 billion in 2000. Exports of primary commodities (animals and crops) also rose, up 54 per cent, from $1.6 billion to $2.5 billion. However, the proportion of raw farm products continued to decline, dropping from 74 per cent in 1991 to 49 per cent in 2000. During the same period, the share of value added products grew from 26 per cent to 51 per cent. These trends reflect the growing importance of value added processed products in Alberta agri-food exports.

In 2000, Alberta exported $5.1 billion worth of agri-food products. The 2000 agri-food exports rose 12 per cent over 1999, following two years of decline. Alberta accounted for 22 per cent of Canadian total agri-food exports, valued at $23.4 billion in 2000, up six per cent from 1999.

Growth in **exports of value added processed products** continued in 2000. Exports of these products, at $2.6 billion, grew 16 per cent over 1999. Gains in value added exports were driven by increased sales of beef, pork, processed potatoes, oilseed cake and meal, malt of barley and cereal preparations. Beef accounted for almost half of total value added exports. During the same period, exports of primary commodities rose nine per cent to $2.5 billion. Larger shipments of barley, wheat, live cattle and hogs contributed to the growth.

EXPORT PRODUCTS

Alberta's top five agri-food exports products in 2000 were beef, wheat, live cattle, canola seed and pork. These five products, together, accounted for 71 per cent of the province's total agri-food exports during the year.

Wheat, historically Alberta's largest export commodity, ranked as the second largest product in 2000. After two years of decline, revenue from exported wheat grew 12 per cent to $1.1 billion. However, the value of wheat exports, as a proportion of total agri-food export revenues declined to 22 per cent from 31 per cent in 1996. Export quantity was also up by 20 per cent to 5.7 million tonnes, from 4.7 million tonnes in 1999. Iran was the number one buyer of Alberta wheat. **Barley** exports rose sharply by 40 per cent in value and 36 per cent in quantity, to $131 million and 677 thousand tonnes. Also, revenue from sales of oats grew 23 per cent and quantity was up 27 per cent.

As a result of global oversupplies of oilseed crops and weak prices, exports of **canola seed** declined 7.1 per cent in value ($397 million) while quantity rose 7.3 per cent. The 2000 sales of canola seed to Japan, Alberta's major market for this commodity, declined 17 per cent to $174 million while quantity was down only 1.4 per cent. As well, exports of canola seed to China decreased 17 per cent to $113 million. However, shipments to the United States, Mexico and South Korea were up. Among the other oilseeds, flaxseed and mustard seed both posted declines in value, of 39 per cent and 24 per cent, respectively.

After three years of decline, exports of **live cattle** (excluding purebred) grew 11 per cent to $509 million in 2000 and quantity was up 1.1 per cent to 398 thousand of head. On the other hand, sales of **live hogs** rose 27 per cent in value owing to better prices with quantity down 3.6 per cent. The United States remained a major market for Alberta live cattle and hogs.

In 2000, beef remained Alberta's largest value added exports, at $1.4 billion, up 17 per cent over 1999, with quantity rising 9.3 per cent to 323 thousand tonnes. For a second year in a row, beef continued to be the number one export product. During the last five years, 1996 to 2000, the share of beef exports of Alberta's total agri-food exports rose from 16 per cent to 28 per cent. The growth in beef exports resulted from increased shipment to the U.S, Mexico, and Japan. In 2000, for the first time ever, Mexico became the second largest market for Alberta beef. Exports to Mexico more than tripled rising from $40 million in 1999 to $123 million in 2000. Traditionally, Japan was the second largest buyer of beef. **Pork** exports rose significantly by 67 per cent to $177 million, as well quantity was up 34 per cent. Substantial increases in exports to Japan, at 165 per cent, contributed to this gain.

Other exports worth to mention are **processed potatoes** (mainly french fries). Exports of this product soared 120 per cent to $157 million in 2000 from $71 million in 1999. Expansion in exports of processed potatoes resulted from increased processing capacity in the province and larger shipments to the U.S.

TRADING PARTNERS

Alberta's top five largest agri-food export markets in 2000 were United States, Japan, Mexico, China and Iran. These five countries, together, represented 80 per cent of the province's total agri-food exports during the year.

The primary destination of Alberta agri-food exports remains the United States. **From 1996 to 2000**, this market represented, on average, more than half of Alberta's total international exports. Japan accounted for an average 13 per cent of the total, China 5.2 per cent, Mexico 3.9 per cent and Iran 2.9 per cent.

THE UNITED STATES

The United States, as always, was Alberta's largest export market for commodities grown and processed in the province. In 2000, agri-food exports to this market reached another record, at $2.8 billion, rising 7.8 per cent over 1999. The 2000 revenue from exports to the U.S. accounted for 54 per cent of Alberta's total agri-food exports.

The 2000 increase in Alberta exports to the U.S. resulted from higher exports of live cattle and hogs, beef, pork, canola seed, processed potatoes, oilseed cake and meal, malt of barley and cereal preparations. Partially offsetting these increases were lower shipments (value and quantity) of wheat, barley and canola oil.

Following three years of decline, the value of **live cattle** (excluding purebred) exported to the U.S. rose 11 per cent to $509 million. However, the number of head increased only 1.1 per cent. The United States is the primary market for Alberta's live cattle and hog shipments. About 99 per cent of cattle and almost 100 per cent of hogs are shipped to this market.

Beef exports grew 3.9 per cent in value, reaching $1.1 billion while quantity was down 3.8 per cent to 247 thousand tonnes. Overall, beef shipments to the U.S. accounted for more than 80 per cent of the total beef quantity shipped to all countries

Shipments **of pork** were up 29 per cent in value and 14 per cent in quantity. The 2000 exports of **live hogs** also rose by 27 per cent to $92 million owing to good prices, while quantity was down 3.6 per cent to 569 thousand head.

With the exception of oats, exports of all other major cereal grains declined in both value and quantity. The value of exported **wheat** was down 10 per cent to $103 million and revenue from **barley** exports declined 1.2 per cent to $45 million. Barley exports dropped to its lowest level during the last five years (1996-2000). Exports of **canola seed** rose 4.2 per cent to $29 million and quantity was up 17 per cent. Shipments of **oilseed cake and meal** continued to grow, rising 25 per cent to $114 million.

Among other agri-food products, exports of processed potatoes are on the rise. This exports more than doubled from $65 million in 1999 to $146 million in 2000.

During the last ten years, revenues from exports to the U.S more than tripled, rising from $742 million in 1991 to a record high of $2.8 billion in 2000. Notable gains occurred in shipments of value added (processed) products. Exports of these products rose from $349 million in 1991 to $1.9 billion in 2000. These products include: fresh, frozen and processed meats, canola oil, processed potatoes, beverages, bakery products, other cereal preparations, animal feeds and other manufactured products. In comparison, exports of raw commodities (animals and crops) rose from $393 million to $861 million in 2000. In 1991, Alberta's agri-food exports to the U.S. consisted of 53 per cent primary commodities and 47 per cent value added processed products. By 2000, the share of value added products had grown to 69 per cent.

JAPAN

Exports to **Japan**, Alberta's second largest market, grew about 11 per cent in 2000 to $634 million, following two years of decline. Major increases occurred in exports of value added products such as pork, beef, malt of barley and processed potatoes. With the exception of barley, exports of all other primary products were down. The 2000 exports of canola seed declined 17 per cent in value ($174 million) due to low prices, while quantity was down 1.4 per cent. Sales of canola seed, as the proportion of Alberta's total agri-food exports to Japan, went down to 27 per cent from about 40 per cent in previous years.

On the positive side, beef exports continued to grow, rising by 41 per cent to $92 million. Also, pork exports grew sharply by 165 per cent to $81 million.

MEXICO

Mexico, the most significant market in the Central America region, ranked third largest among Alberta's agri-food foreign markets, with export revenue rising 63 per cent to $279 million. A record high in exports of beef, at $123 million, contributed to the growth. Traditionally, canola seed, wheat and dairy products are the major export products shipped to this market.

THE PEOPLE'S REPUBLIC OF CHINA

Revenues from exports to the **People's Republic of China**, Alberta's fourth largest market, rose 15 per cent to $215 million, from a value of $187 million in 1999. Exports of wheat and barley showed some improvement following three years of dramatic declines. On the other hand, exports of canola seed were down after two years of significant increases.

OTHER ASIAN COUNTRIES

Alberta agri-food exports posted increases to many Asian countries including South Korea, Taiwan, Indonesia, Philippines, Thailand and India. The largest increase of 120 per cent was reported for South Korea. The increase resulted from a 135 per cent gain in purchases of beef.

Overall, exports to the Asia region (24 per cent of total) were up 12 per cent to $1.2 billion.

OTHER REGIONS

With the exception of Western Europe, Eastern Europe and Oceania, exports to all other major regions increased in 2000.

A significant increase of 60 per cent, occurred in exports to the Middle East, followed by 47 per cent increase in exports to Central America. As well, revenues from exports to South America and Africa were up by more than 20 per cent.
